

Use-Case: Onboard Greenfield EX with switch-specific-config

Goals:

1. ZTP on boarding of switch
2. Push Org-specific config
3. Push Site-specific config
4. Push switch-specific config

Final result:

1. All loopback/IRB config should be pushed
2. OSPF should come up with both Dist-switches
3. Local IRBs should be advertised via OSPF
4. Customer's RFC1918 routes should be learned via OSPF
